DETAILED ACTION

1. Preliminary amendment B, filed August 12, 2002, has been entered.

Claim Objections

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

It is noted that the originally presented claims 36-38 should have been numbered as claims 33-35, and were renumbered by the applicant as claims 33-35 in amendment A, filed January 28, 2002.

Misnumbered claims 39-47 have been renumbered as claims 36-44.

Here it is noted that claim 19 is directed to a method for protecting a substrate structure, however, the subject claim fails to include any steps for protecting a substrate structure. Rather, the body of claim 19 is directed to steps for protecting a faceplate structure. Consequently, it is assumed that the applicant intended to claim a method for protecting a faceplate structure. Alternatively, the scope of claim 19 can not be determined.

Election/Restriction

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1-9, 30-32, 36-44, directed to protected faceplate structures, class 313, subclass 495; and

Group II, claims 10-18, 36-44, directed to protected cathode structure, class 313, subclass 309.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Day whose telephone number is 703/305-4941. The examiner can normally be reached on Monday-Friday, from 8:00 A.M. to 5:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimeshkumar Patel, can be reached by phoning 703/305-4794. The Fax phone number is 703/308-7382.
